Suffolk Festival of Performing Arts

IT Report 2022/23

This report covers the IT aspects of the 2022/2023 festival. During this period there were no software developments required and the system remained unchanged from previous years.

Support was required as a number of speech and drama classes were incorrectly defined in the shop which resulted in the performer's details not being captured. In addition the speech and drama section do not currently have anyone who can handle customer order issues.

There were a few support issues that arose with Dance but the vast majority were handled by the Dance section lead.

Graham Shorrock

Suffolk Festival of Performing Arts IT Manager
